Carefree Sculpture in the Garden Show & Sale

The first of its kind in Arizona, the Inaugural Carefree Sculpture in the Garden Show & Sale takes place in the beautiful Carefree Desert botanical gardens.

CAREFREE, AZ., (January 15, 16, 17, 2016) - Vermillion Promotions, a leading producer of Fine Art, Wine and Culinary Festivals in Arizona and Colorado brings a first of its kind outdoor sculpture show to Carefree, AZ. In addition to hosting many of Arizona's most celebrated festivals, Vermillion also produces the Loveland Fine Art Invitational in Loveland Colorado, one of the Country's largest outdoor sculpture venues. The popular sculpture show and sale attracts thousands of art enthusiasts, public works commissions and collectors from around the world. Upon returning from Loveland in 2015, Vermillion decided to bring a sculpture event to Arizona. According to Candy Vermillion, "the selection of the Carefree Desert Gardens was easy, in Loveland we have to create the sculpture garden, whereas in Carefree we have the stunning botanical gardens creating a dramatic outdoor gallery setting for sculptures". Another striking feature that makes the Carefree Desert Gardens such a perfect venue for the Sculpture Show is the fact that it is home to one of the largest sundials in the United States, a giant copper-clad sculpture located in Sundial Circle in the town of Carefree, Arizona. It was built in 1959 and stretches 62 feet and points to the North Star. The sundial is the third largest in the Western Hemisphere. The sculpture garden will include a diverse selection of sculptures, along with ongoing sculpting demonstrations.
